

## HAVI: Global Leader, Local Partner

HAVI is a global, privately owned company focused on innovating, optimizing and managing the supply chains of leading brands. Offering services in supply chain management, packaging, logistics and recycling & waste, HAVI partners with companies to address challenges big and small across the supply chain, from commodity to customer. Founded in 1974, HAVI employs more than 9,000 people and serves customers in more than 100 countries. HAVI's supply chain services are complemented by the customer engagement services offered by our affiliated company The Marketing Store.

### ▶ LOGISTICS

Our proven expertise in procurement, warehousing, distribution and freight management can help you keep your supply chain - and your business - moving.

In Belgium, our highly trained and dedicated teams set the highest industry and food safety standards while achieving industry-leading reliability levels.

Our unique business model gives our customers full supply chain transparency, allowing them to take advantage of the best deals in the market by sourcing independently from their preferred suppliers. We then integrate the supply chain from source to outlet by managing our customers' information flow, planning and analytics as well as inbound freight deliveries. We also handle financial cash management functions such as invoicing and payment of customer outlets and suppliers.

Ultimately, we free our customers to focus on their customers and grow their businesses by relieving them of key operational logistics tasks - from sourcing and importing the right product, to warehousing and distributing it to the right place at the right time, every time.

### Going greener

We lead the market in building environmentally sustainable businesses. Our teams in Belgium received the Lean & Green Star award after cutting CO<sub>2</sub> emission by over 20%. In addition our Olen distribution center has its own wind turbine that generates almost 70% of its electricity supply.

### ▶ PACKAGING

HAVI provides strategic and operational expertise to ensure that our customers' packaging supports the optimal movement of their products through the supply chain. We take an holistic view, determining how packaging can support a customer's strategic goals from concept development to production to the market and through end of life. In Belgium, we manage packaging supplies at 74 restaurants for the leading global quick service restaurant brand.

### ▶ RECYCLING & WASTE

HAVI provides sustainable end-to-end waste management solutions that drive savings, unlock revenue and protect our customers' brands. In 2011, we joined forces with major waste companies in Belgium to pioneer a unique waste management solution for the food service market. Using advanced waste treatment/recycling technologies, it drives innovation, minimizes environmental impact - and maximizes value.

### ▶ SUPPLY CHAIN MANAGEMENT

Our talented Supply Chain Management experts partner with our customers to understand their business objectives, then deliver a suite of right-sized solutions designed to meet those objectives. We know that our customers' primary focus is always on their own customers. Accordingly, our procurement and planning specialists use their expertise to ensure that our customers never run out of the product their customers want to buy. We also handle all the operational issues associated with managing promotions.
